DETAILED ACTION

1. Claims 1-20 are pending.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The basis of this rejection is set forth in a two-prong test of:

- (1) whether the invention is within the technological arts; and
- (2) whether the invention produces a useful, concrete, and tangible result.

For a claimed invention to be statutory, the claimed invention must be within the technological arts. Mere ideas in the abstract (i.e., abstract idea, law of nature, natural phenomena) that do not apply, involve, use, or advance the technological arts fail to promote the "progress of science and the useful arts" (i.e., the physical sciences as opposed to social sciences, for example) and therefore are found to be non-statutory subject matter. For a process claim, the recited process must somehow apply, involve, use, or advance the technological arts.

In the present case, claims 1-20 only recite an abstract idea. The recited steps of processing a purchase transaction does not apply, involve, use, or advance the technological arts since all of the recited steps can be performed in the mind (processing unit and memory) of the user or by use of a person employing fingers (digital network) implementing the use of a pencil and paper (human readable copy). These steps only constitute an idea of how to process a purchase transaction. Additionally, for a claimed invention to be statutory, the claimed invention must produce a useful, concrete, and tangible result. In the present case, the claimed invention acquires, formats and transmits used in processing a purchase transaction (i.e., useful and tangible).

Although the recited process produces a useful, concrete, and tangible result, since the claimed invention, as a whole, is not within the technological arts as explained above, claims 1-20 are deemed to be directed to non-statutory subject matter.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-20, as understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Bowman et al., US 6,460,163, in view of PR Newswire (hereafter PR).

Bowman discloses a formatted digital receipt, e.g. 317, comprising purchase transaction data, e.g. Fig. 3, a client computer 319 and a computer network. Bowman discloses in col. 9, lines 5-18, retrieving a digital receipt from a database on the cash register server. Bowman does not directly indicate omission of data from a digital receipt, though it is inferred by the various ways the document may be formatted to include/exclude certain information.

PR discloses omitting data from a document by verifying that the document has not been modified.

To have provided omitted data from the digital receipt of Bowman would have been obvious to one of ordinary skill in the art in view of PR. Doing such would incorporate well known document formatting to omit certain information, e.g. a Social Security Number or other identifier, from the digital document of Bowman. To have provided a human readable hard copy of the digital purchase transaction, for Bowman, as modified by PR, would have been obvious to one of ordinary skill in the art as this format is common knowledge in the art.
